

Chieh Feng (Jeff) Lee

EXPERTISES

Software / Web Development	Cloud Services	DevOps
Node.js, React.js	Amazon Web Services, Heroku	Docker, Docker Swarm

EXPERIENCES

Silver Peak Systems

2018/02 - Present Cloud Application Engineer

Silver Peak offers a high-performance SD-WAN solution for enterprises and service providers.

- Redesigned the cloud server cluster architecture using Docker Swarm on Amazon Web Services
- Created a simple management interface to reduce effort for deploying new cloud applications
- Worked on the Blueprint feature for the Orchestrator, which allows large enterprise users to export settings and deploy new Orchestrators with pre-configured settings easily

Health IQ

2016/05 - 2018/02 Software Engineer

Health IQ celebrate the health conscious through social and financial rewards.

- Worked with marketing team on different landing pages to drive more leads in the first 6 months
- Worked on several internal tools integrated with Salesforce, such as custom SMS chat tool, Universal app for client applications, using React and Salesforce APEX
- Wrote several scripts in Node.js to help automate mapping for large amount of client information to third party form generator. Project involves a lot of load balancing and smart string matching

DataWallet

2014/12 - 2015/12 Co-Founder and Lead Engineer

DataWallet is allows users to take control of their own online data and sell them to enterprises.

- Received funding from Tim Draper, founder of DFJ, and Marc Benioff, CEO of Salesforce
- One of the 14 startups in Alchemist Accelerator class 10, attended several events during the 6-month program, and got connected to many VCs after the demo day
- Designed data sourcing modules to get user data from different sources, user and enterprise platforms with APIs and OAuth authentication for developers to analyze the data
